

national science week

Free science week talks part of Inspiring Australia's Talking Science series.

MONDAY 12 AUGUST 2019, 7PM

ARE SMART PHONES MAKING US DUMB? PROFESSOR MARK WILLIAMS

Does the way we play, work and learn on digital devices affect our cognition? Join Dr Mark Williams, a Professor of Cognitive Neuroscience at Macquarie University, to discover how our use of digital devices may be affecting our brains and therefore the reality we 'see'. Free. Bookings essential, visit trybooking.com/BCWDV

THURSDAY 15 AUGUST 2019, 10.30–11.30AM

THE FUTURE OF QUANTUM COMPUTING: PAUL WEBSTER

You might have heard that quantum computing could revolutionise the future, but what is quantum computing? Join Paul Webster, a quantum computing researcher from The University of Sydney, and break through the hype and mystery to learn what quantum computers are, why we don't have them yet, and what it could mean for medicine, food, and more once we do. Free. Bookings essential, visit trybooking.com/BCYWP

FRIDAY 16 AUGUST 2019, 11AM

GREEN BUILDING FOR THE SEA: KATE DODDS

Learn about how the innovative Living Seawalls project is returning marine life to urban shorelines with Macquarie University marine ecologist and PhD researcher Kate Dodds. Free. Bookings essential, visit trybooking.com/BCWEE
